## ARIR PROFILE

ARIR **has been founded in 1989 by a group of Physiotherapists** who want to be the voice of professionals who work in Respiratory Care and contribute to develop this profession ensuring high quality training and continuing medical education and promoting discussion between those were working in Respiratory Physiotherapy and Pulmonary Rehabilitation. The multidisciplinary and Evidence-Based-Medicine approach are the preferred paradigms for pursuing the above objectives.

In the last 20 years, ARIR created significant links and collaboration with associations involved in the field of Physiotherapy and Pulmonary rehabilitation. ARIR was a founder of the **European Respiratory Care Association** (ERCA) and has established national and international partnerships with major scientific societies including **American Association for Respiratory Care** (AARC), **European Respiratory Society** (ERS), **Spanish Society of Pneumology and Thoracic Surgery** (SEPAR), **Associazione Italiana Pneumologi Ospedalieri** (AIPO), **Associazione Italiana Fisioterapisti** (AIFI) and **Società Italiana per le Malattie Respiratorie Infantili** (SIMRI).

One other relevant initiative made by ARIR is the first level professional master's programme on Respiratory Physiotherapy and Pulmonary Rehabilitation, which is now at the twentieth edition and has trained more than 400 italian and foreign in-comer respiratory physiotherapists. This initiative contributes concretely to the commencement of this discipline in Italy.
